Plant Physiol. (1984) 75, iii–ix
0032-0889/84/75/iii/07/$01.00/0

Volume Contents

Number 1. May

1 **Characterization of the Electrogenicity of Soybean (*Glycine max* L.) Roots. ATP Dependence and Effect of ATPase Inhibitors**—Roger R. Lew* and Roger M. Spanswick

7 **Glyoxylate Transamination in Intact Leaf Peroxisomes**—Charles Yu, Zheng Liang, and Anthony H. C. Huang*

13 **Phloem Unloading of Amino Acids at the Site of Attachment of *Cuscuta europaea***—Pieter Wolswinkel*, Ankie Ammerlaan, and Henricus F. C. Peters

21 **Possible Roles of Calcium and Calmodulin in the Biosynthesis and Secretion of α-Amylase in Rice Seed Scutellar Epithelium**—Toshiaki Mitsui, John T. Christeller, Ikuko Hara-Nishimura, and Takashi Akazawa*

26 **Photosynthate Partitioning in Split-Root Citrus Seedlings with Mycorrhizal and Nonmycorrhizal Root Systems**—Karen E. Koch* and Charles R. Johnson

31 **Protein and Lipid Compositions of Isolated Plasma Membranes from Orchard Grass (*Dactylis glomerata* L.) and Changes during Cold Acclimation**—Shizuo Yoshida* and Matsuo Uemura

38 **Studies on Freezing Injury of Plant Cells. I. Relation between Thermotropic Properties of Isolated Plasma Membrane Vesicles and Freezing Injury**—Shizuo Yoshida*

43 **Utilization of a Response-Surface Technique in the Study of Plant Responses to Ozone and Sulfur Dioxide Mixtures**—Douglas P. Ormrod*, David T. Tingey, Marcia L. Gumpertz, and David M. Olszyk

49 **Experimental Determination of the Respiration Associated with Soybean/*Rhizobium* Nitrogenase Function, Nodule Maintenance, and Total Nodule Nitrogen Fixation**—Ross M. Rainbird, William D. Hitz*, and Ralph W. F. Hardy

54 **Auxin Conjugation by Tobacco Mesophyll Protoplasts. Correlations between Auxin Cytotoxicity under Low Density Growth Conditions and Induction of Conjugation Processes at High Density**—Michel Caboche*, Gérard Aranda, Annie Marion Poll, Jean-Claude Huet, and Jean-Jacques Leguay

60 **Glutamic Acid Metabolism and the Photorespiratory Nitrogen Cycle in Wheat Leaves. Metabolic Consequences of Elevated Ammonia Concentrations and of Blocking Ammonia Assimilation**—Kevin A. Walker, Curtis V. Givan*, and Alfred J. Keys

67 **Effect of Endosperm Removal on 7 Normal NaOH-Labile Indole-3-acetic Acid Conjugates in Shoots and Roots of *Zea mays* Seedlings**—Yoshie S. Momonoki and Robert S. Bandurski*

70 **Vacuolar Localization of Endoproteinases EP_1 and EP_2 in Barley Mesophyll Cells**—Susan S. Thayer and Ray C. Huffaker*

74 **Source of Endoproteolytic Activity Associated with Purified Ribulose Bisphosphate Carboxylase**—J. L. Rosichan and Ray C. Huffaker*

78 **Sequence of Key Events in Shoot Gravitropism**—Fernando Migliaccio and David L. Rayle*

82 **Limiting Factors in Photosynthesis. V. Photochemical Energy Supply Colimits Photosynthesis at Low Values of Intercellular CO_2 Concentration**—Scott E. Taylor and Norman Terry*

87 **Abscission: Characterization of Light Control**—Dennis R. Decoteau and Lyle E. Craker*

90 ***Rhizobium* Infection and Nodule Development in Soybean Are Affected by Exposure of the Cotyledons to Light**—Nasir S. A. Malik, Mark K. Pence, Harry E. Calvert, and Wolfgang D. Bauer*

95 **Kok Effect and the Quantum Yield of Photosynthesis. Light Partially Inhibits Dark Respiration**—Robert E. Sharp*, Mark A. Matthews, and John S. Boyer

102 **Osmotic Stress-Induced Polyamine Accumulation in Cereal Leaves. I. Physiological Parameters of the Response**—Hector E. Flores* and Arthur W. Galston

110 **Osmotic Stress-Induced Polyamine Accumulation in Cereal Leaves. II. Relation to Amino Acid Pools**—Hector E. Flores* and Arthur W. Galston

114 **Bound Water in Soybean Seed and Its Relation to Respiration and Imbibitional Damage**—Christina W. Vertucci and A. Carl Leopold*

118 **Isolation and Some Properties of an Aminopeptidase from the Primary Leaf of Wheat (*Triticum aestivum* L.)**—Stephen P. Waters and Michael J. Dalling*

125 **Suppression of Nodule Development of One Side of a Split-Root System of Soybeans Caused by Prior Inoculation of the Other Side**—Renee M. Kosslak and B. Ben Bohlool*

131 **Conditions Required for the Rapid Activation *In Vitro* of the Chloroplast Fructose-1,6-bisphosphatase**—Luciana Rosa* and F. Robert Whatley

138 **Effect of Sulfhydryl Reagents on K^+ Efflux from Rose Cells. Relationship to Ultraviolet-Stimulated Efflux**—Terence M. Murphy*

142 **Light-Induced Transformation of Amyloplasts into Chloroplasts in Potato Tubers**—Yu S. Zhu, Denise L. Merkle-Lehman, and Shain D. Kung*

146 **Reevaluation of the Role of Bicarbonate and Formate in the Regulation of Photosynthetic Electron Flow in Broken Chloroplasts**—Jan F. H. Snel and Jack J. S. Van Rensen*

151 ***In Vivo* Natural-Abundance ^{13}C Nuclear Magnetic Resonance Studies of Living Ectomycorrhizal Fungi. Observation of Fatty Acids in *Cenococcum graniforme and Hebeloma crustuliniforme***—Francis Martin*, Daniel Canet, Jean-Pierre Marchal, and Jean Brondeau

154 **Parachloromercuribenzenesulfonic Acid. A Potential Tool for Differential Labeling of the Sucrose Transporter**—Bertrand M'Batchi and Serge Delrot*

161 **6-Azauracil-Resistant Variants of Cultured Plant Cells Lack Uracil Phosphoribosyltransferase Activity**—Gary E. Jones*

166 **Incorporation of Oxygen into Abscisic Acid and Phaseic Acid from Molecular Oxygen**—Robert A. Creelman and Jan A. D. Zeevaart*

170 **Rapid Accumulation of γ-Aminobutyric Acid and Alanine in Soybean Leaves in Response to an Abrupt Transfer to Lower Temperature, Darkness, or Mechanical Manipulation**—William Wallace, Jacob Secor, and Larry E. Schrader*

176 **Maintenance of Normal or Supranormal Protein Accumulation in Developing Ovules of *Glycine max* L. Merr. during PEG-Induced Water Stress**—Craig S. Pikkaard and Joe H. Cherry*

181 **Concentrations of Sucrose and Nitrogenous Compounds in the Apoplast of Developing Soybean Seed Coats and Embryos**—Francis C. Hsu, Alan B. Bennett, and Roger M. Spanswick*

187 **Source/Sink Relations of Abscising and Nonabscising Soybean Flowers**—William A. Brun* and Kevin J. Betts

192 **Ethylene-Enhanced 1-Aminocyclopropane-1-carboxylic Acid Synthase Activity in Ripening Apples**—Gebhard Bufler*

196 **Deep Supercooling in Most Tissues of Wintering *Sasa senanensis* and Its Mechanism in Leaf Blade Tissues**—Masaya Ishikawa*

203 **Changes in Levels of α-Amylase Components in Barley Tissues during Germination and Early Seedling Growth**—Alexander W. MacGregor*, F. Helen MacDougall, Christiane Mayer, and Jean Daussant

207 **Studies of Sugars and Sorbitol in Developing Corn Kernels**—Janine R. Shaw and David B. Dickinson*

212 **Fermentative Metabolism of *Chlamydomonas reinhardtii*. I. Analysis of Fermentative Products from Starch in Dark and Light**—René P. Gfeller and Martin Gibbs*

SHORT COMMUNICATIONS

219 **Cytosolic NADPH Is the Electron Donor for Extracellular Fe^{III} Reduction in Iron-Deficient Bean Roots**—Peter C. Sijmons*, Wies van den Briel, and H. Frits Bienfait

222 **Evidence for the Occurrence of, and Possible Physiological Role for, Cyanobacterial Calmodulin**—Geoffrey W. Kerson, Jan A. Miernyk*, and Kenneth Budd

225 **Characterization of Oat Vicilin-Like Polypeptides**—Khosrow Adeli* and Illimar Altosaar

228 **Ratio of Cut Surface Area to Leaf Sample Volume for Water Potential Measurements by Thermocouple Psychrometers**—Sue Walker*, Derrick M. Oosterhuis, and Herman H. Wiebe

231 **Protein Synthesis Patterns. Relevance of Old and New Messenger RNA in Germinating Maize Embryos**—Estela Sánchez de Jiménez* and Raul Aguilar

235 ***Helminthosporium maydis* T Toxin Increased Membrane Permeability to Ca^{2+} in Susceptible Corn Mitochondria**—Marcia J. Holden and Heven Sze*

238 **Chlorophyll-Protein Complexes of a Photosystem II Mutant of Maize. Evidence that Chlorophyll-Protein a-2 and a Chlorophyll-Protein Complex Derived from a Photosystem I Antennae System Comigrate on Polyacrylamide Gels**—James G. Metz, Roger W. Krueger, and Donald Miles*

242 **Nitrate Deficiency Shortens the Circadian Period in *Gonyaulax***—Beatrice M. Sweeney* and Susan I. Folli

246 **Synthesis of the psbA Gene Product in *Euglena. In Organello* and *In Vitro***—Ellen M. Reardon* and Carl A. Price

249 **Mefluidide Protection of Severely Chilled Crop Plants**—Menq-Jiau Tseng and Paul H. Li*

251 **Synthesis and Degradation of Nitrite Reductase in Pea Leaves**—Subhash C. Gupta and Leonard Beevers*

253 **Induction of the *De Novo* Formation of the Photosystem I-Related Light-Harvesting Chlorophyll Protein Complex LHCPa by Photoheterotrophic Nutrition**—Peter Brandt* and Wolfgang Wiessner

255 **Effects of Gibberellic Acid on Endogenous Indole-3-Acetic Acid and Indoleacetyl Aspartic Acid Leaves in a Dwarf Pea**—David M. Law* and Robert H. Hamilton

257 **Endogenous Indole-3-Acetic Acid in the Stem of Tobacco in Relation to Flower Neoformation as Measured by Mass Spectroscopic Assay**—Masana Noma*, Naoko Koike, Minoru Sano, and Nobumaro Kawashima

261 **Alfalfa Root Nodule Carbon Dioxide Fixation. II. Partial Purification and Characterization of Root Nodule Phosphoenolpyruvate Carboxylase**—Carroll P. Vance* and Susan Stade

265 **Phosphorylation of Membrane-Located Proteins of Soybean *In Vitro* and Response to Auxin**—D. James Morré*, Jeffrey T. Morré, and Robert L. Varnold

269 **Use of ^{23}Na Nuclear Magnetic Resonance To Follow Sodium Uptake and Efflux in NaCl-Adapted and Nonadapted Millet (*Panicum miliaceum*) Suspensions**—Laurel O. Sillerud* and James W. Heyser

273 **Quantitation and Purification of Quaternary Ammonium Compounds from Halophyte Tissue**—David K. Stumpf*

275 **Ethylene Contamination of CO_2 Cylinders. Effects on Plant Growth in CO_2 Enrichment Studies**—James I. L. Morison* and Roger M. Gifford

278 **Electrophoretic Transfer as a Technique for the Detection and Identification of Plant Amylolytic Enzymes in Polyacrylamide Gels**—Genichi Kakefuda and Stanley H. Duke*

Number 2. June

281 **Salinity Effects on Water Potential Components and Bulk Elastic Modulus of *Alternanthera philoxeroides* (Mart.) Griseb.**—Jorge A. Bolaños and David J. Longstreth*

285 **Characterization of Nitrate Reductase from Corn Leaves (*Zea mays* cv W64A × W182E). Two Molecular Forms of the Enzyme**—Hiroki Nakagawa, Michel Poulle, and Ann Oaks*

290 **Mechanism of Seed Priming in Circumventing Thermodormancy in Lettuce**—Daniel J. Cantliffe*, Jeanne M. Fischer, and Terril A. Nell

295 **Inhibition of 2,4-Dichlorophenoxyacetic Acid-Stimulated Elongation of Pea Stem Segments by a Xyloglucan Oligosaccharide**—William S. York, Alan G. Darvill, and Peter Albersheim*

298 **Nonosmotic Effects of Polyethylene Glycols upon Sodium Transport and Sodium-Potassium Selectivity by Rice Roots**—Anthony R. Yeo* and Timothy J. Flowers

304 **Calorimetry of Nitrogenase-Mediated Reductions in Detached Soybean Nodules**—Peter G. Heytler* and Ralph W. F. Hardy

311 **Effects of Pod Removal on Metabolism and Senescence of Nodulating and Nonnodulating Soybean Isolines. I. Metabolic Constituents**—Steven J. Crafts-Brandner, Frederick E. Below, James E. Harper*, and Richard H. Hageman

318 **Effects of Pod Removal on Metabolism and Senescence of Nodulating and Nonnodulating Soybean Isolines. II. Enzymes and Chlorophyll**—Steven J. Crafts-

Brandner, Frederick E. Below, James E. Harper*, and Richard H. Hageman

323 **Use of Polyethylene Glycol in Isolation and Assay of Stable, Enzymically Active Starch Granules from Developing Wheat Endosperms**—Antonius H. G. C. Rijven*

329 **Involvement of Calcium and Calmodulin in Membrane Deterioration during Senescence of Pea Foliage**—Ya'acov Y. Leshem, Sampath Sridhara, and John E. Thompson*

336 **Photosynthetic Electron Transport in Guard Cells of Diverse Species**—Glen E. Martin II, William H. Outlaw Jr.*, Loran C. Anderson, and Sidney G. Jackson

338 **Influence of Osmotic Adjustment on Leaf Rolling and Tissue Death in Rice (*Oryza sativa* L.)**—Theodore C. Hsiao, John C. O'Toole*, Elizabeth B. Yambao, and Neil C. Turner

342 **Comparative Effects of Ethylene and Cyanide on Respiration, Polysome Prevalence, and Gene Expression in Carrot Roots**—Mark L. Tucker and George G. Laties*

349 **Auxin-Regulated Polypeptide Changes at Different Stages of Strawberry Fruit Development**—K. Veluthambi and B. W. Poovaiah*

354 **Primary Action of Indole-3-acetic Acid in Crown Gall Tumors. Increase of Solute Uptake**—Thomas Rausch*, Günter Kahl, and Willy Hilgenberg

359 **Photobiology of Diagravitropic Maize Roots**—Dina F. Mandoli*, James Tepperman, Eva Huala, and Winslow R. Briggs

364 **Photosynthetic Response and Adaptation to High Temperature in Desert Plants. A Comparison of Gas Exchange and Fluorescence Methods for Studies of Thermal Tolerance**—Jeffery R. Seemann*, Joseph A. Berry, and W. John S. Downton

369 **Regulation of the Shikimate Pathway of Carrot Cells in Suspension Culture**—JoAnn A. Suzich, Raoul Ranjeva, Paul M. Hasegawa, and Klaus M. Herrmann*

372 **Hydraulic Conductance as a Factor Limiting Leaf Expansion of Phosphorus-Deficient Cotton Plants**—John W. Radin* and Marie P. Eidenbock

378 **Temperature Dependence of Photosynthesis in *Agropyron smithii* Rydb. III. Responses of Protoplasts and Intact Chloroplasts**—John Kobza, Ernest G. Uribe*, and George J. Williams III

382 **Characterization of Oat Calmodulin and Radioimmunoassay of Its Subcellular Distribution**—Ronald L. Biro, Sun Daye, Bruce S. Serlin, Maurice E. Terry, Neeraj Datta, Sudhir K. Sopory, and Stanley J. Roux*

387 **Pyruvate Orthophosphate Dikinase of C_3 Seeds and Leaves as Compared to the Enzyme from Maize**—Kazuko Aoyagi and James A. Bassham*

393 **Pyruvate Orthophosphate Dikinase Gene Expression in Developing Wheat Seeds**—Kazuko Aoyagi, James A. Bassham*, and Frank C. Greene

397 **Photosynthetic Carbon Metabolism in Leaves and Isolated Chloroplasts from Spinach Plants Grown under Short and Intermediate Photosynthetic Periods**—J. Michael Robinson*

410 **Activation of Coupling Factor 1 from *Euglena gracilis* Chloroplasts. Conditions for Optimal Activation and Their Possible Physiological Significance**—Joseph S. Kahn*

414 **Effects of Rotenoids on Isolated Plant Mitochondria**—Patrick Ravanel*, Michel Tissut, and Roland Douce

421 **Changes in the Number and Composition of Chloroplasts during Senescence of Mesophyll Cells of Attached and Detached Primary Leaves of Wheat (*Triticum aestivum* L.)**—Terese M. Wardley, Prem L. Bhalla, and Michael J. Dalling*

425 **Lack of ATP Requirement for Light Stimulation of Glycerate Transport into Intact Isolated Chloroplasts**—Simon P. Robinson*

431 **Tissue Specificity of the Heat-Shock Response in Maize**—Pam Cooper, Tuan-Hua David Ho*, and Randal M. Hauptmann

442 **Modification of Cytokinins by Cauliflower Microsomal Enzymes**—Chong-Maw Chen* and Scott M. Leisner

447 **Photoregulation of Anthocyanin Synthesis. VIII. Effect of Light Pretreatments**—Alberto L. Mancinelli*

454 **Influence of Photoperiod and Leaf Age on Crassulacean Acid Metabolism in *Portulacaria afra* (L.) Jacq.**—Lonnie J. Guralnick, Patricia A. Rorabaugh, and Zac Hanscom III*

458 **Biosynthesis of Jasmonic Acid by Several Plant Species**—Brady A. Vick* and Don C. Zimmerman

462 **Ethylene-Induced Chlorosis in the Pathogenesis of *Bipolaris sorokiniana* Leaf Spot of *Poa pratensis***—Clinton F. Hodges* and L. W. Coleman

466 **Sulfate Uptake and Its Regulation in *Lemna paucicostata* Hegelm. 6746**—Anne H. Datko* and S. Harvey Mudd

474 **Responses of Sulfur-Containing Compounds in *Lemna paucicostata* Hegelm. 6746 to Changes in Availability of Sulfur Sources**—Anne H. Datko* and S. Harvey Mudd

480 **Comparisons of Peptide Hydrolase Activities in Cereals**—Michael J. Winspear, Kenneth R. Preston, Vipin Rastogi, and Ann Oaks*

483 **Effect of N-Source on Soybean Leaf Sucrose Phosphate Synthase, Starch Formation, and Whole Plant Growth**—Phillip S. Kerr, Steven C. Huber*, and Daniel W. Israel

Constitutive Enzymes in Cultured Cells of *Picea excelsa*—Claus-Henning Rolfs and Helmut Kindl*

493 **Rhythmicity in Ethylene Production in Cotton Seedlings**—Arnon Rikin, Edo Chalutz, and James D. Anderson*

SHORT COMMUNICATIONS

496 **Pollination-Induced Corolla Wilting in *Petunia hybrida* Rapid Transfer through the Style of a Wilting-Inducing Substance**—Luud J. W. Gilissen and Folkert A. Hoekstra*

499 **Divergent Transport Mechanisms for Pyrimidine Nucleosides in *Petunia* Pollen**—Rajender K. Kamboj and John F. Jackson*

502 **A Rapid Reverse Phase Evaporation Method for the Reconstitution of Uncharged Thylakoid Membrane Lipids That Resist Hydration**—Sallie G. Sprague* and L. Andrew Staehelin

505 **Oxalate Metabolism by Tobacco Leaf Discs**—Evelyn A. Havir*

508 **A Rapid, Sensitive Method for Quantitating Subunits in Purified Ribulose Bisphosphate Carboxylase Preparations**—T. John Andrews and Beth Ballment

Number 3. July

511 **Aspartate Carbamyltransferase. Site of End-Product Inhibition of the Orotate Pathway in Intact Cells of *Cucurbita pepo*—**Carol J. Lovatt* and Anne H. Cheng

516 **Glycolate Metabolism Is Under Nitrogen Control in *Chlorella*—**Rob. F. Beudeker and F. Robert Tabita*

521 **Glucose 6-Phosphate Dehydrogenase Isozymes of Maize Leaves. Some Comparative Properties—**Vicenzo Valenti, Maria A. Stanghellini, and Paolo Pupillo*

527 **Utilization of the Amide Groups of Asparagine and 2-Hydroxysuccinamic Acid by Young Pea Leaves—**Trung Chanh Ta, Kenneth W. Joy*, and Robert J. Ireland

531 **Enzymes of β-Oxidation in Different Types of Algal Microbodies—**Helmut Stabenau*, U. Winkler, and W. Säftel

534 **Tunicamycin Prevents Cellulose Microfibril Formation in *Oocystis solitaria*—**Hartmut Quader*

539 **Light-Induced Nuclear Synthesis of Spinach Chloroplast Fructose-1,6-bisphosphatase—**Ana Chueca, Juan José Lázaro, and Julio López Gorgé*

542 **Measurement of Subcellular Metabolite Levels in Leaves by Fractionation of Freeze-Stopped Material in Nonaqueous Media—**Richard Gerhardt and Hans W. Heldt*

548 **Control of Photosynthetic Sucrose Synthesis by Fructose 2,6-Bisphosphate. I. Coordination of CO_2 Fixation and Sucrose Synthesis—**Mark Stitt*, Bernd Herzog, and Hans W. Heldt

554 **Control of Photosynthetic Sucrose Synthesis by Fructose 2,6-Bisphosphate. II. Partitioning between Sucrose and Starch—**Mark Stitt*, Birgit Kürzel, and Hans W. Heldt

561 **Control of Photosynthetic Sucrose Synthesis by Fructose 2,6-Bisphosphate. III. Properties of the Cytosolic Fructose 1,6-Bisphosphatase—**Bernd Herzog, Mark Stitt*, and Hans W. Heldt

566 **Control of Lactate Dehydrogenase, Lactate Glycolysis, and α-Amylase by O_2 Deficit in Barley Aleurone Layers—**Andrew D. Hanson* and John V. Jacobsen

573 **Regulated Expression of Three Alcohol Dehydrogenase Genes in Barley Aleurone Layers—**Andrew D. Hanson*, John V. Jacobsen, and John A. Zwar

582 **A Highly Sensitive, Flow Through H_2 Gas Analyzer for Use in Nitrogen Fixation Studies—**David B. Layzell*, Glenn E. Weagle, and David T. Canvin

586 **Effects of Vanadate on the Plasma Membrane ATPase of Red Beet and Corn—**Sharman D. O'Neill and Roger M. Spanswick*

592 **Isolation and Identification of the Phenols of Paul's Scarlet Rose Stems and Stem-Derived Suspension Cultures—**Michael J. Muhitch and John S. Fletcher*

596 **Pea Xyloglucan and Cellulose. I. Macromolecular Organization—**Takahisa Hayashi* and Gordon Maclachlan

605 **Pea Xyloglucan and Cellulose. II. Hydrolysis by Pea Endo-1,4-β-Glucanases—**Takahisa Hayashi*, Yuk-Shan Wong, and Gordon Maclachlan

611 **Solubilization and Reconstitution of Pisatin Demethylase, a Cytochrome P-450 from the Pathogenic Fungus *Nectria haematococca*—**Anne E. Desjardins*, David E. Matthews, and Hans D. VanEtten

617 **Reserve Carbohydrate in Maize Stem. [^{14}C]Glucose and [^{14}C]Sucrose Uptake Characteristics—**Tim Lloyd Setter* and Victoria H. Meller

623 **Dependency of Nitrate Reduction on Soluble Carbohydrates in Primary Leaves of Barley under Aerobic Conditions—**Muhammad Aslam and Ray C. Huffaker*

629 **A Transmissible Plant Shoot Factor Promotes Uptake Hydrogenase Activity in *Rhizobium* Symbionts—**Eulogio J. Bedmar and Donald A. Phillips*

634 **Genetic Regulation of Flowering in Grafts on *Pisum sativum* L.—**William M. Proebsting*

639 **Heat Shock Proteins in Tobacco Cell Suspension during Growth Cycle—**Jan Kanabus, Craig S. Pikaard, and Joe H. Cherry*

645 **Kinetic Variance of Ribulose-1,5-bisphosphate Carboxylase/Oxygenase Isolated from Diverse Taxonomic Sources. II. Analysis By Two Dual Label Methods—**Samuel Sherrill Kent* and Michael John Tomany

651 **Influence of Sulfur Nutrition on Developmental Patterns of Some Major Pea Seed Proteins and Their mRNAs—**Peter M. Chandler, Donald Spencer*, Peter J. Randall, and Thomas J. V. Higgins

658 **Resolution and Reconstitution of Mg-Protoporphyrin IX Monomethyl Ester (Oxidative) Cyclase, the Enzyme System Responsible for the Formation of the Chlorophyll Isocyclic Ring—**Yum-Shing Wong and Paul A. Castelfranco*

662 **Localization of Mg-Chelatase and Mg-Protoporphyrin IX Monomethyl Ester (Oxidative) Cyclase Activities within Isolated, Developing Cucumber Chloroplasts—**Thomas P. Fuesler, Yum-Shing Wong, and Paul A. Castelfranco*

665 **Partitioning of Nitrogen among Ribulose-1,5-bisphosphate Carboxylase/Oxygenase, Phosphoenolpyruvate Carboxylase, and Pyruvate Orthophosphate Dikinase as Related to Biomass Productivity in Maize Seedlings—**Tatsuo Sugiyama*, Masuhiko Mizuno, and Masanori Hayashi

670 **Purification of Peroxisomes and Mitochondria from Spinach Leaf by Percoll Gradient Centrifugation—**Jean-Paul Schwitzguebel and Paul-André Siegenthaler*

675 **Thermolysin Is a Suitable Protease for Probing the Surface of Intact Pea Chloroplasts—**Kenneth Cline, Margaret Werner-Washburne, Jaen Andrews, and Kenneth Keegstra*

679 **Physiological Studies on Pea Tendrils. XIV. Effects of Mechanical Perturbation, Light, and 2-Deoxy-D-Glucose on Callose Deposition and Tendril Coiling—**Terrence E. Riehl* and Mordecai J. Jaffe

688 **Photosynthesis in *Encelia farinosa* Gray in Response to Decreasing Leaf Water Potential—**James R. Ehleringer* and Craig S. Cook

694 **Relationships between Respiration Rate and Adenylate and Carbohydrate Pools of the Soybean Fruit—**Gary M. Fader and H. Ronald Koller*

700 ***In Vitro* Fatty Acid Synthesis and Complex Lipid Metabolism in the Cyanobacterium, *Anabaena variabilis*. II. Acyl Transfer and Complex Lipid Formation—**Nora W. Lem and Paul K. Stumpf*

705 **Purification of Hydrogenase from *Chlamydomonas reinhardtii*—**Paul G. Roessler and Stephen Lien*

710 **Secretion of α-Amylase by the Aleurone Layer and the Scutellum of Germinating Barley Grain—**Harri Ranki and Tuomas Sopanen*

716 **Suberin Production by Isolated Tomato Fruit Protoplasts—**Gonella S. R. L. Rao, J. H. Martin Willison*, and W. M. Nimal Ratnayake

720 **Freezing Characteristics of Cultured *Catharanthus roseus* (L.) G. Don Cells Treated with Dimethylsulfoxide and Sorbitol in Relation to Cryopreservation—**Tony

H. H. Chen, Kutty K. Kartha*, Friedrich Constabel, and Lawrence V. Gusta

726 **Cryopreservation of Alkaloid-Producing Cell Cultures of Periwinkle (*Catharanthus roseus*)**—Tony H. H. Chen, Kutty K. Kartha*, Nicholas L. Leung, Wolfgang G. W. Kurz, Kenneth B. Chatson, and Friedrich Constabel

732 **Novel Phycoerythrins in Marine *Synechococcus* spp. Characterization and Evolutionary and Ecological Implications**—Randall S. Alberte*, A. Michelle Wood, Thomas A. Kursar, and Robert R. L. Guillard

740 **Enzymic Dissociation of *Zea* Shoot Cell Wall Polysaccharides. I. Preliminary Characterization of the Water-Insoluble Fraction of *Zea* Shoot Cell Walls**—Yoji Kato and Donald J. Nevins*

745 **Enzymic Dissociation of *Zea* Shoot Cell Wall Polysaccharides. II. Dissociation of (1→3),(1→4)-β-D-Glucan by Purified (1→3),(1→4)-β-D-Glucan 4-Glucanohydrolase from *Bacillus subtilis***—Yoji Kato and Donald J. Nevins*

753 **Enzymic Dissociation of *Zea* Shoot Cell Wall Polysaccharides. III. Purification and Partial Characterization of an Endo(1→4)-β-D-Xylanase from a *Bacillus subtilis* Enzyme Preparation**—Yoji Kato and Donald J. Nevins*

759 **Enzyme Dissociation of *Zea* Shoot Cell Wall Polysaccharides. IV. Dissociation of Glucuronoarabinoxylan by Purified Endo-(1→4)-β-Xylanase from *Bacillus subtilis***—Yoji Kato and Donald J. Nevins*

766 **Theoretical and Experimental Errors for *In Situ* Measurements of Plant Water Potential**—Kenneth A. Shackel*

773 **Stimulation of Mitochondrial Calcium Uptake by Light during Growth of Corn Shoots**—Tomoyuki Yamaya, Ann Oaks*, and Hideaki Matsumoto

778 **Heat Stress Responses in Cultured Plant Cells. Heat Tolerance Induced by Heat Shock *versus* Elevated Growing Temperature**—Min-Tze Wu and Stephen J. Wallner*

781 **Synthesis and Turnover of the Chloroplast Coupling Factor 1 in *Chlamydomonas reinhardi***—Sabeeha Merchant and Bruce R. Selman*

788 **Structural Characterization of a Higher Plant Calmodulin. *Spinacia oleracea***—Thomas J. Lukas*, David B. Iverson, Michael Schleicher, and D. Martin Watterson

796 **Comparison of the NAD Kinase and Myosin Light Chain Kinase Activator Properties of Vertebrate, Higher Plant, and Algal Calmodulins**—Daniel M. Roberts, Wilson H. Burgess, and D. Martin Watterson*

799 **Influence of Applied NaCl on Crassulacean Acid Metabolism and Ionic Levels in a Cactus, *Cereus validus***—Park S. Nobel*, Ulrich Lüttge, Sabine Heuer, and Erika Ball

804 **Day-Night Variations in Malate Concentration, Osmotic Pressure, and Hydrostatic Pressure in *Cereus validus***—Ulrich Lüttge and Park S. Nobel*

808 **Elongation of the First Internode of the Pea Seedling during Etiolation. Interaction of Environment and Genotype**—Constance Nozzolillo* and Sylvie Seguin

813 **Inhibition and Stimulation of Root Respiration in *Pisum* and *Plantago* by Hydroxamate. Its Consequences for the Assessment of Alternative Path Activity**—Ries De Visser* and Tjeerd Blacquière

818 **Involvement of Plasma Membrane Alterations in Cold Acclimation of Winter Rye Seedlings (*Secale cereale* L. cv Puma)**—Matsuo Uemura* and Shizuo Yoshida

827 **Site of Action of Chlorosulfuron. Inhibition of Valine and Isoleucine Biosynthesis in Plants**—Thomas B. Ray*

832 **Optimal Conditions for Translation by Thylakoid-Bound Polysomes from Pea Chloroplasts**—Devaki Bhaya and Andre T. Jagendorf*

839 **Glyphosate Inhibition of 5-Enolpyruvylshikimate 3-Phosphate Synthase from Suspension-Cultured Cells of *Nicotiana silvestris***—Judith L. Rubin, C. Greg Gaines, and Roy A. Jensen*

846 **Is Modulation of the Rate of Proton Pumping a Key Event in Osmoregulation?**—Leonora Reinhold*, Aza Seiden, and Micha Volokita

850 **Kinetics of Accumulation of Ribulose-1,5-bisphosphate Carboxylase during Greening in *Euglena gracilis*. Photoregulation**—Georges Freyssinet, Richard L. Eichholz, and Dennis E. Buetow*

858 **Kinetics of Accumulation of Ribulose-1,5-bisphosphate Carboxylase during Greening in *Euglena gracilis*. Nutritional Regulation**—Georges Freyssinet, Martine Freyssinet, and Dennis E. Buetow*

SHORT COMMUNICATIONS

862 **Measurement of the Pyrophosphate Content of Plant Tissues**—Douglas A. Smyth and Clanton C. Black, Jr.*

865 **Analysis of the Complexity and Diversity of mRNAs from Pollen and Shoots of *Tradescantia***—R. Paul Willing and Joseph P. Mascarenhas*

869 **Leakage of Dhurrin and *p*-Hydroxybenzaldehyde from Young Sorghum Shoots Immersed in Various Solvents**—Francis A. Haskins* and H. J. Gorz

873 **Sulfate Assimilation in C_4 Plants. Intercellular and Intracellular Location of ATP Sulfurylase, Cysteine Synthase, and Cystathionine β-Lyase in Maize Leaves**—James N. Burnell*

876 **A Comparative Study of CN-Resistant Respiration in Different Cultures of Tobacco Callus**—Hou-guo Liang and Chung-shu Lü*

879 **Corrections**

Number 4. August

881 **Effect of Shortened Photosynthetic Period on ^{14}C-Assimilate Translocation and Partitioning in Reproductive Soybeans**—Dale R. Carlson* and William A. Brun

887 **Alteration of ^{14}C-Assimilate Partitioning in Leaves of Soybeans Having Increased Reproductive Loads at One Node**—Dale R. Carlson* and William A. Brun

891 ***In Vitro* Characterization of Tomato Fruit Softening. The Use of Enzymically Active Cell Walls**—James W. Rushing and Donald J. Huber*

895 **Tissue Distribution of Acetyl-Coenzyme A Carboxylase in Leaves**—Basil J. Nikolau, Eve Syrkin Wurtele, and Paul K. Stumpf*

902 **Effect of the Defoliant Thidiazuron on Ethylene Evolution from Mung Bean Hypocotyl Segments**—Jeffrey C. Suttle*

908 **Isopentenyl Pyrophosphate *cis*-1,4-Polyisoprenyl Transferase from Guayule (*Parthenium argentatum* Gray)**—S. Madhavan and Chauncey R. Benedict*

914 **Selection, Isolation, and Characterization of Cadmium-Resistant *Datura innoxia* Suspension Cultures**—Paul J. Jackson*, E. Jill Roth, Peter R. McClure, and Cleo M. Naranjo

919 **Oxygen Uptake and Photosynthesis of the Red Macroalga, *Chondrus crispus*, in Seawater. Effects of Light and CO_2 Concentration**—François Brechignac* and Marcel Andre

924 **Adsorption of Slow- and Fast-Growing *Rhizobia* to Soybean and Cowpea Roots**—Steven G. Pueppke*

929 **Protein Synthesis in Embryos of Dormant and Germinating *Agrostemma githago* L. Seeds**—Geert Jan de Klerk* and René Smulders

936 **Sugar Transport into Protoplasts Isolated from Developing Soybean Cotyledons. I. Protoplast Isolation and General Characteristics of Sugar Transport**—Willy Lin*, Mark R. Schmitt, William D. Hitz, and Robert T. Giaquinta

941 **Sugar Transport into Protoplasts Isolated from Developing Soybean Cotyledons. II. Sucrose Transport Kinetics, Selectivity, and Modeling Studies**—Mark R. Schmitt, William D. Hitz, Willy Lin*, and Robert T. Giaquinta

947 **Salt Stimulation of Phosphate Uptake in Maize Root Tips Studied by ^{31}P Nuclear Magnetic Resonance**—Justin K. M. Roberts*, Carey S. Linker, Anthony G. Benoit, Oleg Jardetzky, and Richard H. Nieman

951 **Energetics of Proline Transport in Corn Mitochondria**—Thomas E. Elthon, Cecil R. Stewart*, and Walter D. Bonner, Jr.

956 **Characterization of Peroxidase in Plant Cells**—Ravindra N. Chibbar and Robert B. van Huystee*

959 **Concentration Gradients of *trans*-Zeatin Riboside and *trans*-Zeatin in the Maize Stem. Measurement by a Specific Enzyme Immunoassay**—Carl E. Hansen, Herman Wenzler, and Frederick Meins, Jr.*

964 **A New Type of Hexose Monophosphate Shunt in *Chlorella sorokiniana*. $^{14}CO_2$ Release from Differentially Labeled Glucose**—Robert L. Heath*

968 **Characterization of the Proton-Translocating Cytochrome *c* Oxidase Activity in the Plasma Membrane of Intact *Anacystis nidulans* Spheroplasts**—Günter A. Peschek*

974 **Proline and Glycine Betaine Influence Protein Solvation**—Leslie G. Paleg*, George R. Stewart, and Joseph W. Bradbeer

979 **Tissue Distribution of β-Cyanoalanine Synthase in Leaves**—Eve Syrkin Wurtele, Basil J. Nikolau, and Eric E. Conn*

983 **On the Molecular Mechanism of Maize Phosphoenolpyruvate Carboxylase Activation by Thiol Compounds**—Alberto A. Iglesias and Carlos S. Andreo*

988 **Ultrasonic Acoustic Emissions from the Sapwood of Cedar and Hemlock. An Examination of Three Hypotheses Regarding Cavitations**—Melvin T. Tyree*, Michael A. Dixon, E. Loeta Tyree, and Robert Johnson

993 **Photosynthetic Characteristics of C_3–C_4-Intermediate *Flaveria* Species. III. Reduction of Photorespiration by a Limited C_4 Pathway of Photosynthesis in *Flaveria ramosissima***—Mary E. Rumpho, Maurice S. B. Ku*, Shu-Hua Cheng, and Gerald E. Edwards

997 **UV-B Inhibition of Phytochrome-Mediated Anthocyanin Formation in *Sinapis alba* L. Cotyledons. Action Spectrum and the Role of Photoreactivation**—Eckard Wellmann, Ulricke Schneider-Ziebert, and Christopher J. Beggs*

1001 **Factors Permitting Prolonged Translation by Isolated Pea Chloroplasts**—Helen T. Nivison and Andre T. Jagendorf*

1009 **Factors Affecting the Emission of Monoterpenes from Red Pine (*Pinus densiflora*)**—Yoko Yokouchi* and Yoshinari Ambe

1013 **A High Proportion of Hybridomas Raised to a Plant Extract Secrete Antibody to Arabinose or Galactose**—M. A. Anderson*, M. S. Sandrin, and A. E. Clarke

1017 **Determination of Compartmented Metabolite Pools by a Combination of Rapid Fractionation of Oat Mesophyll Protoplasts and Enzymic Cycling**—Rüdiger Hampp*, Marion Goller, and Helene Füllgraf

1022 **Short-Term Effects of CO_2 on Gas Exchange of Leaves of Bigtooth Aspen (*Populus grandidentata*) in the Field**—Thomas W. Jurik*, James A. Weber, and David M. Gates

1027 **Auxin-Induced Regulation of Protein Synthesis in Tobacco Mesophyll Protoplasts Cultivated *In Vitro*. I. Characteristics of Auxin-Sensitive Proteins**—Yves Meyer*, Lorette Aspart, and Yvette Chartier

1034 **Auxin-Induced Regulation of Protein Synthesis in Tobacco Mesophyll Protoplasts Cultivated *In Vitro*. II. Time Course and Level of Auxin Control**—Yves Meyer*, Lorette Aspart, and Yvette Chartier

1040 **^{14}C-Photosynthate Partitioning and Translocation in Soybeans during Reproductive Development**—Karen E. Koch* and Larry E. Schrader

1044 **Salinity Effects on Photosynthesis and Growth in *Alternanthera philoxeroides* (Mart.) Griseb**—David J. Longstreth*, Jorge A. Bolaños, and James E. Smith

1048 **Relationship between Auxin and Amino Acid Metabolism of Tobacco Protoplast-Derived Cells**—Annie Marion-Poll* and Michel Caboche

1054 **Effects of Temperature and CO_2 Enrichment on Carbon Translocation of Plants of the C_4 Grass Species *Echinochloa crus-galli* (L.) Beauv. from Cool and Warm Environments**—Catherine Potvin*, John D. Goeschl, and Boyd R. Strain

1058 **Studies on Genetic Male-Sterile Soybeans. III. The Initiation of Monocarpic Senescence**—John J. Burke*, Willy Kalt-Torres, James R. Swafford, Joseph W. Burton, and Richard F. Wilson

1064 **Growth and Photosynthesis of the Cyanobacterium *Synechococcus leopoliensis* in HCO_3^--Limited Chemostats**—Anthony G. Miller, David H. Turpin, and David T. Canvin*

1071 **Removal by a Trace of Sodium of the Period Lengthening of the Potassium Uptake Rhythm Due to Lithium in *Lemna gibba* G3**—Takao Kondo*

1075 **Membrane Organization of the Desiccation-Tolerant Moss *Tortula ruralis* in Dehydrated States**—Jas Singh*, Barbara A. Blackwell, Richard W. Miller, and J. Derek Bewley

1080 **Effect of Photoperiod on Photosynthate Partitioning and Diurnal Rhythms in Sucrose Phosphate Synthase Activity in Leaves of Soybean (*Glycine max* L. [Merr.]) and Tobacco (*Nicotiana tabacum* L.)**—Steven C. Huber*, Thomas W. Rufty, and Phillip S. Kerr

1085 **Promotion of Flowering in *Brassica campestris* L. cv Ceres by Sucrose**—Douglas J. C. Friend*, Monique Bodson, and Georges Bernier

1090 **Does Pollination Induce Corolla Abscission of Cyclamen Flowers by Promoting Ethylene Production?**—Abraham H. Halevy*, Charles S. Whitehead, and Anton M. Kofranek

1094 **Effect of Phosphorus and Zinc Nutrition on Soybean Seed Phytic Acid and Zinc**—Victor Raboy* and David B. Dickinson

1099 **Effect of Ammonium on Nitrate Utilization by Roots of Dwarf Bean**—Hans Breteler* and Marco Siegerist

1104 **Purine Synthesis and Catabolism in Soybean Seedlings. The Biogenesis of Ureides**—Deborah A. Polayes and Karel R. Schubert*

1111 **Azido Auxins. Photoaffinity Labeling of Auxin-Binding Proteins in Maize Coleoptile with Tritiated 5-Azidoindole-3-Acetic Acid**—Alan M. Jones, L. Lee Melhado, T-H. David Ho, Cedric J. Pearce, and Nelson J. Leonard*

1117 **Quantitation of Cytokinins in Biological Samples Using Antibodies against Zeatin Riboside**—Jane Badenoch-Jones*, David S. Letham, Charles W. Parker, and Barry G. Rolfe

1126 **Mode of Action of Abscisic Acid in Barley Aleurone Layers. Abscisic Acid Induces Its Own Conversion to Phaseic Acid**—Scott J. Uknes and Tuan-Hua David Ho*

1133 **Cell Surfaces in Plant-Microorganism Interactions. IV. Fungal Glycopeptides Which Elicit the Synthesis of Ethylene in Plants**—Alain Toppan* and Marie-Thérèse Esquerré-Tugayé

1139 **Behavior of the Plasma Membrane of Isolated Protoplasts during a Freeze-Thaw Cycle**—Michael F. Dowgert and Peter L. Steponkus*

1152 **Evidence for the Accumulation of Peroxidized Lipids in Membranes of Senescing Cotyledons**—K. Peter Pauls and John E. Thompson*

1158 **Enzymes of the Poly-β-Hydroxybutyrate and Citric Acid Cycles of *Rhizobium japonicum* Bacteroids**—Dale B. Karr, James K. Waters, Fumiko Suzuki, and David W. Emerich*

SHORT COMMUNICATIONS

1163 **Polyproline II Conformation in the Protein Component of Arabinogalactan-Protein from *Lolium multiflorum***—Gerrit-Jan van Holst and Geoffrey B. Fincher*

1165 **Introduction of Xylem Differentiation in *Lactuca* by Ethylene**—A. Raymond Miller*, William L. Pengelly, and Lorin W. Roberts

1167 **Burst of Ethylene upon Horizontal Placement of Tomato Seedlings**—Marcia Harrison and Barbara G. Pickard*

Subject Index

A

Abscisic acid
  aleurone mode of action, barley, 1126
  ^{18}O incorporation, *Xanthium*, 166
Abscission
  light, mung bean, 87
  source/sink relations, soybean flower, 187
Acetyl-coenzyme A carboxylase, tissue distribution, leaf, 895
Acyl transfer, *Anabaena*, 700
Adenylate pool, respiration rate, soybean fruit, 694
Agropyron smithii, temperature-dependent photosynthesis, 378
Agrostemma githago, seed protein synthesis, 929
Alanine, leaf content, soybean, 170
Alcohol dehydrogenase, gene expression, barley, 573
Aleurone
  abscisic acid mode of action, barley, 1126
  alcohol dehydrogenase gene expression, barley, 573
  α-amylase secretion, barley, 710
  lactate glycolysis, barley, 566
Alfalfa
  electrophoretic transfer of amylolytic enzymes, 278
  root nodule carbon dioxide fixation, 261
Alkaloid-producing cells, cryopreservation, periwinkle, 726
Alligator weed
  salinity and photosynthesis, 1044
  salinity and water relations, 281
Alternanthera philoxeroides (*see* Alligator weed)
Amino acid
  metabolism and auxin, tobacco, 1048
  phloem unloading, broad bean, 13
γ-Aminobutyric acid, leaf content, soybean, 170
1-Aminocylcopropane-1-carboxylic acid synthase, ethylene-enhanced activity, apple, 192
Aminopeptidase, wheat leaf, 118
Ammonium, nitrate utilization, bean, 1099
α-Amylase
  barley germination, 203
  biosynthesis/secretion, rice seed, 21
  O_2 deficit control, barley, 566
  secretion, barley, 710
Amylolytic enzymes, detection in electrophoretic gels, alfalfa, 278
Amyloplast, light-induced transformation, potato, 142
Anabaena variabilis, acyl transfer, 700
Anacystis nidulans, Cyt *c* oxidase activity, 968
Anthocyanin
  synthesis photoregulation, cabbage/rye/tomato, 447
  UV-B inhibition, *Sinapis*, 997
Apple, ethylene-enhanced 1-aminocyclopropane-1-carboxylic acid synthase, 192
Arabinogalactan protein, polyproline II conformation, ryegrass, 1163
Arabinose, monoclonal antibody secretion, tobacco, 1013
Arachis hypogaea L. (*see* Peanut)
Asparagine utilization, pea leaf, 527
Aspartate carbamyltransferase, orotate pathway regulation, squash, 511
ATP-dependent membrane potenial, soybean root, 1
ATPase, vanadate effects, red beet/corn, 586
Auxin
  amino acid metabolism, tobacco, 1048
  -binding protein labeling, maize, 1111
  conjugation, tobacco protoplast, 54
  polypeptide changes, strawberry, 349
  protein phosphorylation, soybean, 265
  protein synthesis regulation, tobacco, 1027, 1034
  shoot gravitropism, sunflower, 78
Avena fatua (*see* Wild oat)
Avena sativa (*see* Oat)

B

Bacteroid enzymes, *Rhizobium*, 1158
Barley
  ABA mode of action, 1126
  alcohol dehydrogenase gene expression, 573
  α-amylase levels during germination, 203
  α-amylase secretion, 710
  carbohydrates in NO_3 assimilation, 623
  endoproteinase contamination of ribulose bisphosphate carboxylase, 74
  lactate glycolysis control by O_2 deficit, 566
  peptide hydrolase, 480
  polyamines and osmotic stress, 102
  protein solvation, 974
  vacuolar localization of endoproteinases, 70
Bean
  ammonium and nitrate utilization, 1099
  Fe^{III} reduction and NADPH, iron-deficient roots, 219
  lipid peroxidation, cotyledon, 1152
  pyruvate orthophosphate dikinase, 387
Beta vulgaris L. (*see* Red beet, Sugar beet)
Bicarbonate, electron flow regulation, pea, 146
Bigtooth aspen CO_2 and gas exchange, 1022
Bipolaris sorokiniana, leaf spot pathogenesis and ethylene, *Poa*, 462
Bound water, soybean seed, 114
Brassica campestris, sucrose promotion of flowering, 1085
Brassica oleracea L. (*see* Cabbage, Cauliflower)
Broad bean
  Cuscuta and amino acid phloem unloading, 13
  parachloromercuribenzenesulfonic acid as sucrose transporter label, 154
Bulk elastic modulus, salinity, *Alternanthera*, 281

C

^{14}C assimilate
  partitioning alteration, soybean, 887
  translocation and partitioning, soybean, 881
^{14}C photosynthate, partitioning and translocation, soybean, 1040
C_3-C_4 intermediate, photosynthesis, *Flaveria*, 993
C_4 plant, sulfate assimilation, 873
Cabbage, anthocyanin synthesis photoregulation, 447
Cadium-resistant cell line, *Datura*, 914
Calcium
  α-amylase biosynthesis/secretion, rice seed, 21
  leaf senescence, pea, 329
  uptake by light, corn, 773
Callose deposition, tendril studies, pea, 679
Callus, CN-resistant respiration, tobacco, 876
Calmodulin
  α-amylase biosynthesis/secretion, rice seed, 21
  kinase activator properties, pea, 796
  leaf senescence, pea, 329
  oat, 382
  Oscillatoria, 222
  structural analysis, spinach, 788
Calorimetry, soybean nodules, 304
Carbohydrate, role in NO_3 assimilation, barley, 623
Carbohydrate pool, respiration rate, soybean fruit, 694
Carbon
  metabolism, photoperiod effect, spinach, 397
  translocation, temperature and CO_2, *Echinochloa*, 1054
Carbon dioxide
  carbon translocation, *Echinochloa*, 1054
  cylinders, ethylene contamination, 275
  fixation, alfalfa root nodule, 261
  gas exchange, bigtooth aspen, 1022
  low concentration and photosynthesis, sugar beet, 82
  oxygen uptake and photosynthesis, *Chondrus*, 919
Carrizo citrange, photosynthates and Mycorrhizae, 26
Carrot
  ethylene and cyanide, root, 342
  shikimate pathway regulation, 369
Castor bean, pyruvate orthophosphate dikinase, 387
Catharanthus roseus L. (*see* Periwinkle)
Cauliflower, cytokinin modification by microsomal enzymes, 442
Cedar, ultrasonic acoustic emissions, 988
Cell
  alkaloid-producing, cryopreservation, periwinkle, 726
  auxin and amino acid metabolism, tobacco, 1048
  cadmium-resistant, *Datura*, 914
  endoproteinase vacuolar localization, barley, 70
  enzyme targets of glyphosate, tobacco, 839
  freezing characteristics, periwinkle, 720
  heat shock protein, tobacco, 639
  heat stress response, pear, 778
  K^+ efflux stimulation, rose, 138
  phenol, rose, 592
  shikimate pathway regulation, carrot, 369
  surface, ethylene elicitors, melon/soybean/tobacco, 1133

Cell wall, polysaccharide enzymic dissociation, corn, 740, 745, 753, 759
Cellulose
  microfibril formation and tunicamycin, *Oocystis*, 534
  pea, 596, 605
Cenococcum graniforme, ^{13}C nuclear magnetic resonance study, 151
Cereus validus
  applied NaCl and CAM, 799
  day-night variations, 804
Chalcone synthase, spruce, 489
Chilling injury, mefluidide protection, corn/cucumber, 249
Chlamydobotrys stellata, induction of PSI light-harvesting Chl protein complex, 253
Chlamydomonas reinhardtii
  chloroplast coupling factor 1 synthesis, 781
  fermentative metabolism, 212
  hydrogenase purification, 705
Chlorella sorokiniana
  glycolate metabolism, 516
  pentose cycle, 964
Chlorophyll-protein complex, PSII maize mutant, 238
Chloroplast
  bicarbonate effect and electron flow, pea, 146
  coupling factor 1 synthesis and turnover, *Chlamydomonas*, 781
  fructose-1,6-bisphosphatase activation, spinach, 131
  fructose-1,6-bisphosphatase synthesis, spinach, 539
  glycerate transport, pea, 425
  leaf senescence, wheat, 421
  Mg-protoporphyrin IX monomethyl ester (oxidative) cyclase, cucumber, 658, 662
  photoperiod and photosynthesis, spinach, 397
  prolonged translation, pea, 1001
  temperature-dependent photosynthesis, *Agropyron*, 378
  surface probe by thermolysin, pea, 675
  translation by thylakoid-bound polysomes, pea, 832
Chlorsulfuron, site of action, pea, 827
Chondrus crispus, oxygen uptake and photosynthesis, 919
Circadian period, nitrate deficiency, *Gonyaulax*, 242
Citric acid cycle enzymes, *Rhizobium*, 1158
Citrus aurantium L. (*see* Sour orange)
Coleoptile, auxin-binding protein labeling, maize, 1111
Colletotrichum lagenarium, ethylene elicitation, melon/soybean/tobacco, 1133
Corn
  acetyl-CoA carboxylase localization, 895
  cytokinin radioimmunoassay, 1117
  deseeding effect on IAA conjugates, 67
  jasmonic acid biosynthesis, 458
  mefluidide protection from chilling injury, 249
  mitochondrial calcium uptake, 773
  mitochondrial membrane permeability to Ca^{2+}, 235
  mitochondrial proline transport, 951
  nitrate reductase, leaf, 285
  polyamines and osmotic stress, 102
  polysaccharide enzymic dissociation, 740, 745, 753, 759
  pyrophosphate content, 862
  sugars and sorbitol, 207
  vanadate and plasma membrane ATPase, 586
Corolla
  abscission and ethylene, cyclamen, 1090
  wilting, *Petunia*, 496
Cotton
  ethylene production rhythmicity, 493
  P nutrition and hydraulic conductance, 372
Cotyledon
  light and nodulation, soybean, 90
  lipid peroxidation in senescence, bean, 1152
  sugar transport into protoplasts, soybean, 936, 941
  UV-B inhibition of phytochrome-induced anthocyanin, *Sinapis*, 997
Coupling factor 1 activation, *Euglena*, 410
Cowpea, rhizobia adsorption to roots, 924
Crassulacean acid metabolism
  applied NaCl, *Cereus*, 799
  photoperiod and leaf age influence, *Portulacaria*, 454
Crown gall tumor, IAA, potato, 354
Cryopreservation, alkaloid-producing cells, periwinkle, 726
Cucumber
  mefluidide protection from chilling injury, 249
  Mg-protoporphyrin IX monomethyl ester (oxidative) cyclase, 658, 662
Cucumis melo (*see* Melon)
Cucumis sativus L. (*see* Cucumber)
Cucurbita pepo L. (*see* Squash)
Cuscuta europaea, effect on amino acid phloem unloading, broad bean, 13
Cyanide
  ethylene comparison, carrot root, 342
  -resistant respiration, tobacco callus, 876
β-Cyanoalanine synthase, tissue distribution, leaf, 979
Cyclamen, ethylene and corolla abscission, 1090
Cyclamen persicum (*see* Cyclamen)
Cytochrome oxidase, H^+-translocating, *Anacystis*, 968
Cytokinin
  concentration gradients, maize, 959
  modification by microsomal enzymes, cauliflower, 442
  radioimmunoassay, lupin/corn, 1117

D

Dactylis glomerata L. (*see* Orchard grass)
Dark respiration, Kok effect and quantum yield, sunflower, 95
Datura innoxia
  6-azauracil-resistant variant, 161
  cadmium-resistant cell line, 914
Daucus carota L. (*see* Carrot)
Day-night variation, malate concentration and osmotic pressure, *Cereus*, 804
Deep supercooling, *Sasa*, 196
Dehydration, membrane organization, *Tortula*, 1075
Deseeding, effect on IAA coinjugates, corn, 67
Desert plant, photosynthesis and high temperature, 364
Dhurrin, shoot leakage, sorghum, 869
Dimethylsulfoxide, cell freezing characteristics, periwinkle, 720
Duckweed, potassium uptake rhythm, 1071

E

Echinochloa crus-galli, carbon translocation, 1054
Eggplant, jasmonic acid biosynthesis, 458
Electrogenicity, soybean root, 1
Electron flow, bicarbonate effect, pea, 146
Electron transport, guard cell, 336
Embryo, protein synthesis patterns, maize, 231
Encelia farinosa, leaf water potential and photosynthesis, 688
Endoproteinase
  contamination of ribulose bisphosphate carboxylase, barley, 74
  vacuolar localization, barley, 70
Endosperm, active starch granule, wheat, 323
5-Enolpyruvylshikimate 3-phosphate synthase, inhibition by glyphosate, tobacco, 839
Enzyme
  dissociation, cell wall polysaccharide, corn, 740, 745, 753, 759
  Rhizobium bacteroids, 1158
Eremosphaera viridis, β-oxidation, 531
Ethylene
  1-aminocyclopropane-1-carboxylic acid synthase activity, apple, 192
  Bipolaris leaf spot pathogenesis, *Poa*, 462
  contamination of CO_2 cylinders, 275
  corolla abscission, cyclamen, 1090
  cyanide comparison, carrot root, 342
  elicitation, melon/soybean/tobacco, 1133
  evolution, thidiazuron, mung bean, 902
  production, cotton, 493
  seedling placement, tomato, 1167
  xylem differentiation, lettuce, 1165
Etiolation, pea seedling, 808
Euglena gracilis
  coupling factor 1 activation, 410
  photogene product, 246
  ribulose-1,5-bisphosphate carboxylase accumulation kinetics, 850, 858

F

Fatty acid synthesis, *Anabaena*, 700
Fermentative metabolism, *Chlamydomonas*, 212
Flaveria sp., C_3-C_4 intermediate photosynthesis, 993
Flax, jasmonic acid biosynthesis, 458
Flower
  ethylene and corolla abscission, cyclamen, 1090
  neoformation, IAA, tobacco, 257
  source/sink relations, soybean, 187
Flowering
  genetic regulation, pea, 634
  sucrose promotion, *Brassica*, 1085
Fragaria ananassa (see Strawberry)
Freeze-thaw cycle, protoplast plasma membrane behavior, rye, 1139
Freezing injury, plasma membrane thermotropic transition, orchard grass, 38
Fructose-1,6-bisphosphatase
  activation, spinach chloroplast, 131
  nuclear synthesis, spinach, 539
Fructose 2,6-bisphosphate, sucrose synthesis control, spinach, 548, 554, 561
Fruit
  auxin-regulated polypeptide changes, strawberry, 349
  respiration rate and adenylate pool, soybean, 694
  softening, tomato, 891
  suberin production, tomato, 716

G

Galactose, monoclonal antibody secretion, tobacco, 1013
Gas exchange, CO_2 effects, bigtooth aspen, 1022
Gene expresison
  alcohol dehydrogenase, barley, 573
  ethylene/cyanide effects, carrot root, 342
  pyruvate orthophosphate dikinase, wheat seed, 393
Genetic regulation, flowering, pea, 634
Germination, α-amylase levels, barley, 203
Gibberellic acid, effects on IAA, pea, 255
Glucose 6-phosphate dehydrogenase, leaf isozymes, maize, 521
Glutamic acid metabolism, photorespiration, wheat, 60
Glycerate transport, pea chloroplast, 425
Glycine betaine, protein solvation, barley, 974
Glycine max L. (*see* Soybean)
Glycolate metabolism, nitrogen control, *Chlorella*, 516
Glyoxylate transamination, spinach leaf, 7
Glyphosate, enzyme targets, tobacco, 839
Gonyaulax polyedra, nitrate deficiency and circadian period, 242
Gravitropism, maize root, 359
Growth
  HCO_3-limited chemostats, *Synechococcus*, 1064
  inhibition by xyloglucan oligosaccharide, pea stem, 295
  salinity, alligator weed, 1044
  whole plant, N source effect, soybean, 483
Guard cell, electron transport, 336
Guayule, rubber transferase, 908

H

Halophyte tissue, quaternary ammonium compounds, 273
Haplopappus gracilis, 6-azauracil-resistant variant, 161
HCO_3-limited chemostat, growth and photosynthesis, *Synechococcus*, 1064
Heat shock protein
  cell culture, tobacco, 639
  maize, 431
Hebeloma crustuliniforme, ^{13}C nuclear magnetic resonance study, 151
Helianthus annus (*see* Sunflower)
Helminthosporium maydis T toxin, mitochondrial membrane permeability to Ca^{2+}, corn, 235
Hemlock, ultrasonic acoustic emissions, 988
Hexose monophosphate shunt, *Chlorella*, 964
Hordeum distichum L. (*see* Barley)
Hordeum vulgare L. (*see* Barley)
Hydraulic conductance, P nutrition, cotton leaf, 372
Hydrogen analyzer, N_2 fixation study, soybean, 582
Hydrogenase
  Chlamydomonas, 705
  shoot factor and uptake activity, *Rhizobium*-pea symbiosis, 629
Hydroxamate, root respiration, pea/*Plantago*, 813
Hydroxysuccinamic acid utilization, pea leaf, 527
Hypocotyl, thidiazuron and ethylene evolution, mung bean, 902

I

Indole-3-acetic acid
  crown gall tumors, potato, 354
  deseeding effect on conjugates, corn, 67
  flowering tobacco stem, 257
  GA, effects, pea, 255
Iron-deficient roots, Fe^{III} reduction and NADPH, bean, 219
Isoleucine, biosynthesis inhibition, pea, 827

J

Jasmonic acid, biosynthesis in plants, 458

K

K^+ efflux, stimulation by *N*-ethylmaleimide, rose, 138
Kinase, activator properties, calmodulin, pea, 796
Kok effect, dark respiration in light, sunflower, 95

L

Lactate glycolysis, O_2 deficit control, barley, 566
Lactuca sativa L. (*see* Lettuce)
Leaf
  acetyl-CoA carboxylase localization, 895
  age, influence on CAM, *Portulacaria*, 454
  γ-aminobutyric acid and alanine accumulation, soybean, 170
  aminopeptidase, wheat, 118
  asparagine/hydroxysuccinamic acid utilization, pea, 527
  ^{14}C assimilate partitioning alteration, soybean, 887
  carbohydrates in NO_3 assimilation, barley, 623
  chloroplast senescence, wheat, 421
  CO_2 and gas exchange, bigtooth aspen, 1022
  β-cyanoalanine synthase distribution, 979
  deep supercooling, *Sasa*, 196
  disc oxalate metabolism, tobacco, 505
  ethylene-induced chlorosis and pathogenesis, *Poa*, 462
  glucose 6-phosphate dehydrogenase, maize, 521
  glutamate metabolism and photorespiration, wheat, 60
  glyoxylate transamination, spinach, 7
  nitrate reductase, corn, 285
  nitrate reductase regulation, pea, 251
  P nutrition and hydraulic conductance, cotton, 372
  peroxisome/mitochondria purification, spinach, 670
  polyamines and osmotic stress, cereal, 102, 110
  pyruvate orthophosphate dikinase, C_3 plants, 387
  rolling, osmotic adjustment/tissue death, rice, 338
  sample size, thermocouple psychrometry, soybean, 228
  senescence
    calcium/calmodulin, pea, 329
    soybean, 1058
  shortened daylength and photosynthesis, spinach, 397
  subcellular metabolite levels, spinach, 542
  sucrose phosphate synthase rhythm, soybean/tobacco, 1080
  sucrose phosphate synthase, soybean, 483
  sulfate assimilation, maize, 873
  water potential and photosynthesis, *Encelia*, 688
Leek
  acetyl-CoA carboxylase localization, 895
  β-cyanoalanine synthase, leaf, 979
Lemna gibba (*see* Duckweed)
Lemna paucicostata
  sulfate uptake regulation, 466
  sulfur availability and sulfur-containing compound response, 474
Lettuce
  response surfaces for mixture effects, 43
  seed priming and thermodormancy, 290
  xylem differentiation by ethylene, 1165
Light
  abscission, mung bean, 87
  chloroplast fructose-1,6-bisphosphatase synthesis, spinach, 539
  glycerate transport stimulation, pea, 425
  -induced amyloplast transformation, potato, 142
  Kok effect and dark respiration, sunflower, 95
  mitochondrial calcium uptake, corn, 773
  nodulation, soybean, 90
  oxygen uptake and photosynthesis, *Chondrus*, 919
Linum usitatissimum L. (*see* Flax)
Lipid
  metabolism, *Anabaena*, 700
  peroxidation, senescing cotyledon, bean, 1152
  reconstitution, reverse phase evaporation method, spinach, 502
Lolium multiflorum (*see* Ryegrass)
Lupin, cytokinin radioimmunoassay, 1117
Lupinus luteus (*see* Lupin)
Lycopersicon esculentum L. (*see* Tomato)

M

Maize
  auxin-binding protein labeling, 1111
  Chl-protein complexes of PSII mutant, 238
  β-cyanoalanine synthase, leaf, 979
  cytokinin gradients, 959
  ethylene contamination of CO_2 cylinders, 275
  glucose 6-phosphate dehydrogenase isozymes, 521
  heat shock proteins, 431
  N partitioning among carbon assimilating enzymes, 665
  peptide hydrolase, 480
  phosphate uptake stimulation, maize, 947
  protein synthesis patterns, 231
  pyruvate orthophosphate dikinase, 387
  root gravitropism, 359
  sugar uptake, 617
  sulfate assimilation, 873
  thiol activation of phosphoenolpyruvate carboxylase, 983
Malate, day-night concentrations, *Cereus*, 804
Malus sylvestris (*see* Apple)
Medicago sativa L. (*see* Alfalfa)
Mefluidide, chilling injury protection, corn/cucumber, 249
Melon, ethylene elicitors, 1133
Membrane (*see also* Plasma membrane)
  calcium/calmodulin and leaf senescence, pea, 329
  lipid peroxidation, bean, 1152
  organization in dehydration, *Tortula*, 1075

Membrane—*continued*
permeability to Ca^{2+}, corn mitochondria, 235
potential, ATP dependence, soybean root, 1
Metaboite, subcellular levels, spinach, 542
Metabolite pool, size determination, oat, 1017
Mg-chelatase localization, cucumber, 662
Mg-protoporphyrin IX monomethyl ester (oxidative) cyclase, cucumber, 658, 662
Microsomal enzyme, cytokinin modification, cauliflower, 442
Millet, sodium uptake/efflux, 269
Mitochondria
proline transport, corn, 951
purification, spinach, 670
rotenoid effects, potato/mung bean, 414
Monoclonal antibody, secretion to arabinose/galactose, tobacco, 1013
Monoterpene emission, red pine, 1009
Mougeotia sp., β-oxidation, 531
Mung bean
ethylene contamination of CO_2 cylinders, 275
light and abscission, 87
rotenoids and mitochondria, 414
thidiazuron and ethylene evolution, 902
Mycorrhizae, photosynthate partitioning, split-root citrus, 26

N

NADPH, Fe^{III} reduction, bean roots, 219
Nectria haematococca, pisatin demethylase, 611
Nicotiana alata (*see* Tobacco)
Nicotiana silvestris (*see* Tobacco)
Nicotiana tabacum (*see* Tobacco)
Nitrate
deficiency, circadian period, *Gonyaulax*, 242
reduction, carbohydrate dependence, barley, 623
utilization, ammonium, bean, 1099
Nitrate reductase, corn leaf, 285
Nitrite reductase, regulation, pea, 251
Nitrogen
cycle, glutamate metabolism, wheat, 60
fixation, soybean nodule, 49
fixation study, H_2 analyzer use, soybean, 582
glycolate metabolism control, *Chlorella*, 516
partitioning among carbon assimilating enzymes, maize, 665
source, sucrose phosphate synthase, soybean, 483
Nitrogenous compounds, developing seed concentrations, soybean, 181
Nodule
calorimetry, soybean, 304
CO_2 fixation, alfalfa, 261
development
light, soybean, 90
suppression by *Rhizobium*, soybean, 125
nitrogen fixation, soybean, 49
Nuclear magnetic resonance
ectomycorrhizal fungi study, 151
phosphate uptake and regulation, maize, 947
sodium uptake/efflux, millet, 269

O

Oat
calmodulin, 382
compartmented metabolite pools, 1017
jasmonic acid biosynthesis, 458
peptide hydrolase, 480
polyamines and osmotic stress, 102, 110
vicilin-like polypeptides, 225
Oocystis solitaria, tunicamycin and cellulose microfibril formation, 534
Orchard grass
plasma membrane composition, 31
plasma membrane freezing injury, 38
Orotate pathway, regulation at aspartate carbamyltransferase, squash, 511
Oryza sativa L. (*see* Rice)
Oscillatoria limnetica, calmodulin, 222
Osmoregulation, proton pumping, *Senecio*, 846
Osmotic adjustment, leaf rolling/tissue death, rice, 338
Osmotic pressure, day-night variations, *Cereus*, 804
Osmotic stress, polyamine accumulation, cereal leaf, 102, 110
Oxalate metabolism, tobacco leaf discs, 505
β-Oxidation, algal microbodies, 531
Oxygen
ABA and phaseic acid incorporation, *Xanthium*, 166
lactate glycolysis, barley, 566
uptake, *Chondrus*, 919
Ozone/sulfur dioxide mixture, plant response, lettuce/radish/pea, 43

P

Panicum miliaceum (*see* Millet)
Parachloromercuribenzenesulfonic acid, sucrose transporter labeling, broad bean, 154
Parthenium argentatum (*see* Guayule)
Pathogenesis, leaf spot and ethylene-induced chlorosis, *Poa*, 462
Pea
acetyl-CoA carboxylase localization, 895
asparagine/hydroxysuccinamic acid utilization, 527
bicarbonate effect and electron flow, 146
calcium/calmodulin and membrane deterioration, leaf senescence, 329
callose deposition and tendril coiling, 679
calmodulin kinase activator properties, 796
chloroplast translation, 1001
chlorsulfuron site of action, 827
β-cyanoalanine synthase, leaf, 979
GA_3 effects on IAA, 255
genetic regulation of flowering, 634
glycerate transport into chloroplast, 425
hydroxamate and root respiration, 813
nitrite reductase regulation, 251
polyamines and osmotic stress, 102
pyrophosphate content, 862
pyruvate orthophosphate dikinase, 387
response surfaces for mixture effects, 43
seed protein and mRNA levels, 651
seedling etiolation, 808
stem growth inhibition by xyloglucan oligosaccharide, 295
thermolysin as chloroplast surface probe, 675
translation by thylakoid-bound polysomes, 832
xyloglucan and cellulose, 596, 605
Pea-*Rhizobium* symbiosis, shoot factor and uptake hydrogenase activity, 629
Peanut, peroxidase, 956
Pear, cell heat stress response, 778
Pentose cycle, *Chlorella*, 964
Peptide hydrolase, cereals, 480
Percoll gradient centrifugation, peroxisome/mitochondria purification, spinach, 670
Periwinkle
cryopreservation of alkaloid-producing cells, 726
freezing characteristics, 720
Peroxidase, peanut, 956
Peroxidation, senescing cotyledon, bean, 1152
Peroxisome
glyoxylate transamination, spinach leaf, 7
purification, spinach, 670
Petunia hybrida
pollination/stigma wounding/corolla wilting, 496
pyrimidine nucleoside transport, pollen, 499
Phalaris, ethylene contamination of CO_2 cylinders, 275
Phalaris aquatica L. (*see* Phalaris)
Phaseic acid, ^{18}O incorporation, *Xanthium*, 166
Phaseolus aureus (*see* Mung bean)
Phaseolus vulgaris L. (*see* Bean)
Phenol, cell culture and stem, rose, 592
Phloem unloading, amino acids, broad bean, 13
Phosphate, uptake stimulation by salt, maize, 947
Phosphoenolpyruvate carboxylase
activation by thiol, maize, 983
N partitioning, maize, 665
Phosphorus nutrition
hydraulic conductance, cotton, 372
soybean, 1094
Photogene product synthesis, *Euglena*, 246
Photoheterotrophic nutrition, induction of PSI light-harvesting Chl protein complex, *Chlamydobotrys*, 253
Photoperiod
influence on CAM, *Portulacaria*, 454
shortened daylength and photosynthesis, spinach, 397
sucrose phosphate synthase diurnal rhythm, soybean/tobacco, 1080
Photoregulation, anthocyanin synthesis, cabbage/rye/tomato, 447
Photosynthate partitioning
photoperiod effect, soybean/tobacco, 1080
split-root citrus seedling, 26
Photosynthesis
C_3-C_4 intermediate, *Flaveria*, 993
Chondrus, 919
guard cell, 336
HCO_3-limited chemostats, *Synechococcus*, 1064
high temperature adaptation, desert plants, 364
Kok effect and quantum yield, sunflower, 95
leaf water potential, *Encelia*, 688
limiting factors, sugar beet, 82
photoperiod effect, spinach, 397
salinity, alligator weed, 1044
temperature dependence, *Agropyron*, 378
Photosynthetic period, ^{14}C assimilate translocation, soybean, 881
Photosystem I, light-harvesting Chl protein complex induction, *Chlamydobotrys*, 253
Photosystem II mutant, Chl-protein complexes, maize, 238
Phycoerythrin, *Synechococcus* sp., 732
Phytochrome-induced anthocyanin, UV-B inhibition, *Sinapis*, 997

Picea excelsa (*see* Spruce)
Pinus densiflora (*see* Red pine)
Pisatin demethylase, *Nectria*, 611
Pisum sativum L. (*see* Pea)
Plantago sp., hydroxamate and root respiration, 813
Plasma membrane
cold acclimation, rye, 818
composition, orchard grass, 31
Cyt *c* oxidase activity, *Anacystis*, 968
protoplast freeze-thaw behavior, rye, 1139
thermotropic properties and freezing injury, orchard grass, 38
vanadate and ATPase, red beet/corn, 586
Plum, pyruvate orthophosphate dikinase, 387
Poa pratensis, ethylene-induced chlorosis and leaf spot pathogenesis, 462
Pod removal, metabolism and senescence, soybean, 311, 318
Pollen
pyrimidine nucleoside transport, *Petunia*, 499
mRNA, *Tradescantia*, 865
Pollination
corolla abscission, cyclamen, 1090
Petunia, 496
Poly-β-hydroxybutyrate cycle enzymes, *Rhizobium*, 1158
Polyacrylamide gel, amylolytic enzyme detection, alfalfa, 278
Polyamine, osmotic stress, cereal leaf, 102, 110
Polyethylene glycol
active starch granule isolation/assay, wheat, 323
-induced water stress, seed development, soybean 176
Na/K selectivity, rice, 298
Polypeptide
auxin-regulated changes, strawberry, 349
vicilin-like, oat, 225
Polyproline II conformation, ryegrass, 1163
Polysaccharide, enzymic dissociation, corn, 740, 745, 753, 759
Polysome
prevalence, ethylene/cyanide effects, carrot root, 342
translation conditions, pea, 832
Poncirus trifoliata × *Citrus sinensis* (*see* Carrizo citrange)
Populus grandidentata (*see* Bigtooth aspen)
Portulacaria afra L., photoperiod and leaf age, 454
Potassium, uptake rhythm, duckweed, 1071
Potato
auxin antagonists and solute uptake, 354
light-induced amyloplast transformation, 142
rotenoids and mitochondria, 414
Proline
mitochondrial transport, corn, 951
protein solvation, barley, 974
Protein
accumulation, water stress, soybean, 176
auxin-binding labeling, maize, 1111
phosphorylation, auxin-stimulated, soybean, 265
solvation, barley, 974
synthesis
Agrostemma seeds, 929
auxin-induced regulation, tobacco, 1027, 1034
maize embryo, 231
mRNA levels, pea seed, 651
Proton pumping, osmoregulation, *Senecio*, 846
Protoplast
auxin and amino acid metabolism, tobacco, 1048
auxin conjugation, tobacco, 54
compartmented metabolite pools, oat, 1017
plasma membrane freeze-thaw behavior, rye, 1139
protein synthesis regulation, tobacco, 1027, 1034
suberin production, tomato, 716
sugar transport, soybean cotyledon, 936, 941
temperature-dependent photosynthesis, *Agropyron*, 378
Prunus tomentosa L. (*see* Plum)
Purine synthesis/catabolism, soybean, 1104
Pyrimidine nucleoside transport, *Petunia* pollen, 499
Pyrophosphate, pea/corn, 862
Pyrus communis (*see* Pear)
Pyruvate orthophosphate dikinase
gene expression, wheat seed, 393
maize/C_3 seeds and leaves, 387
N partitioning, maize, 665

Q

Quaternary ammonium compounds, quantitation/purification, halophyte tissue, 273

R

Radish, response surfaces for mixture effects, 43
Raphanus sativus L. (*see* Radish)
Red beet, vanadate and plasma membrane ATPase, 586
Red pine, monoterpene emission, 1009
Respiration
adenylate/carbohydrate pools, soybean fruit, 694
CN-resistant, tobacco callus, 876
hydroxamate effects, pea/*Plantago* root, 813
Response-surface technique, O_3/SO_2 mixture, lettuce/radish/pea, 43
Reverse phase evaporation, galactolipids, spinach, 502
Rhizobia, adsorption to roots, soybean/cowpea, 924
Rhizobium
nodulation suppression, soybean, 125
nodule nitrogen fixation, soybean, 49
Rhizobium japonicum
bacteroid enzymes, 1158
infection and nodulation, light effects, soybean, 90
Rhizobium-pea symbiosis, shoot factor and uptake hydrogenase activity, 629
Ribulose-1,5-bisphosphate carboxylase
accumulation kinetics, *Euglena*, 850, 858
contamination by endoproteinase, barley, 74
subunit quantitation, 508
Ribulose-1,5-bisphosphate carboxylase/oxygenase
kinetic variance in diverse sources, 645
N partitioning, maize, 665
Rice
α-amylase biosynthesis/secretion, 21
ethylene contamination of CO_2 cylinders, 275
osmotic adjustment/leaf rolling/tissue death, 338
peptide hydrolase, 480
polyethylene glycol and Na/K selectivity, 298
Ricinus communis L. (*see* Castor bean)
mRNA
levels in seed protein, pea, 651
maize embryo, 231
Tradescantia, 865
Root
ammonium and nitrate utilization, bean, 1099
electrogenicity, soybean, 1
ethylene and cyanide, carrot, 342
gravitropism, maize, 359
iron-deficient, Fe^{III} reduction and NADPH, bean, 219
nodule CO_2 fixation, alfalfa, 261
phosphate uptake stimulation by salt, maize, 947
polyethylene glycol and Na/K selectivity, rice, 298
respiration and hydroxamate, pea/*Plantago*, 813
rhizobia adsorption, soybean/cowpea, 924
Rosa damascena (*see* Rose)
Rose
cell culture and stem phenols, 592
K^+ efflux stimulation, 138
Rotenoid, mitochondria, potato/mung bean, 414
Rubber transferase, guayule, 908
Rye
anthocyanin synthesis photoregulation, 447
peptide hydrolase, 480
plasma membrane and cold acclimation, 818
protoplast plasma membrane freeze-thaw behavior, 1139
Ryegrass, arabinogalactan protein conformation, 1163

S

Salinity
photosynthesis and growth, alligator weed, 1044
water relations, *Alternanthera*, 281
Salt
CAM and ionic levels, *Cereus*, 799
phosphate uptake stimulation, maize root, 947
Sapwood, ultrasonic acoustic emissions, cedar/hemlock, 988
Sasa senanensis, deep supercooling, 196
Scutellum, α-amylase secretion, barley, 710
Secale cereale L. (*see* Rye)
Seed
α-amylase biosynthesis/secretion, rice, 21
apoplastic solutes, soybean, 181
bound water and imbibitional damage, soybean, 114
development, water stress, soybean, 176
phosphorus/zinc nutrition, soybean, 1094
priming, and thermodormancy, lettuce, 290
protein synthesis, *Agrostemma*, 929
proteins and mRNA levels, pea, 651
pyruvate orthophosphate dikinase, C_3 plants, 387
Seedling
α-amylase levels, barley, 203
deseeding effect on IAA conjugates, corn, 67
ethylene burst and horizontal placement, tomato, 1167
ethylene production rhythmicity, cotton, 493
etiolation, pea, 808
N partitioning among carbon assimilating enzymes, maize, 665

Seedling—*continued*
photosynthates and Mycorrhizae, split-root citrus, 26
plasma membrane and cold acclimation, rye, 818
purine synthesis/catabolism, soybean, 1104
Senecio mikanioides, proton pumping and osmoregulation, 846
Senescence
leaf
calcium/calmodulin involvement, pea, 329
chloroplast, wheat, 421
soybean, 1058
lipid peroxidation in cotyledon, bean, 1152
pod removal, soybean, 311, 318
Shikimate pathway, carrot cell, 369
Shoot
dhurrin leakage, sorghum, 869
gravitropism, sunflower, 78
mitochondrial calcium uptake, corn, 773
polysaccharide enzymic dissociation, corn, 740, 745, 753, 759
mRNA, *Tradescantia*, 865
Shoot factor, *Rhizobium* hydrogenase, 629
Sinapis alba, UV-B inhibition of phytochrome-induced anthocyanin, 997
Sodium
potassium uptake rhythm, duckweed, 1071
transport, polyethylene glycol, rice, 298
uptake/efflux, millet, 269
Solanum melongena L. (*see* Eggplant)
Solanum tuberosum L. (*see* Potato)
Solute uptake, auxin antagonists, potato, 354
Sorbitol
cell freezing characteristics, periwinkle, 720
developing corn kernels, 207
Sorghum
acetyl-CoA carboxylase localization, 895
β-cyanoalanine synthase, leaf, 979
dhurrin leakage from shoots, 869
peptide hydrolase, 480
Sorghum bicolor L. (*see* Sorghum)
Sorghum bicolor × *Sorghum sudanense* (*see* Sorghum)
Sour orange, photosynthates and Mycorrhizae, 26
Source/sink relations, abscising flower, soybean, 187
Soybean
γ-aminobutyric acid and alanine accumulation in leaves, 170
aproplastic solutes in developing seed, 181
auxin-stimulated protein phosphorylation, 265
bound water and imbibitional damage, 114
^{14}C assimilate partitioning alteration, 887
^{14}C assimilate translocation and partitioning, 881
calorimetry of nodules, 304
electrogenicity, root, 1
energetics of nitrogen fixation, 49
ethylene elicitors, 1133
H_2 analyzer for N_2 fixation study, 582
leaf sample size in thermocouple psychrometry, 228
leaf senescence, 1058
light and nodulation, 90
metabolism and senescence, pod removal, 311, 318
nodulation suppression by *Rhizobium*, 125
phosphorus/zinc nutrition, 1094
photosynthate partitioning and translocation, 1040
purine synthesis/catabolism, 1104
respiration rate and adenylate pool, 694
rhizobia adsorption to roots, 924
source/sink relations, flower, 187
sucrose phosphate synthase rhythm, 1080
sucrose phosphate synthase, leaf, 483
sugar transport into cotyledon protoplasts, 936, 941
water stress and seed development, 176
Spinach
calmodulin structure, 788
chloroplast fructose-1,6-bisphosphatase activation, 131
chloroplast fructose-1,6-bisphosphatase synthesis, 539
galactolipid reverse phase evaporation, 502
glyoxylate transamination, leaf peroxisomes, 7
peroxisome/mitochondria purification, 670
pyruvate orthophosphate dikinase, 387
shortened daylength and photosynthesis, 397
subcellular leaf metabolite levels, 542
sucrose synthesis and fructose, 2,6-bisphosphate, 548, 554, 561
Spinacia oleracea L. (*see* Spinach)
Spruce, stilbene synthase and chalcone synthase, 489
Squash, orotate pathway regulation, 511
Starch
formation, N source effect, soybean, 483
granules, wheat endosperm, 323
Stem
cytokinin gradients, maize, 959
growth inhibition by xyloglucan oligosaccharide, pea, 295
phenol, rose, 592
sugar uptake, maize, 617
Stigma wounding, *Petunia*, 496
Stilbene synthase, spruce, 489
Strawberry, auxin-regulated polypeptide changes, 349
Suberin production, tomato, 716
Sucrose
developing seed concentrations, soybean, 181
flowering promotion, *Brassica*, 1085
synthesis control by fructose 2,6-bisphosphate, spinach, 548, 554, 561
transporter labeling, broad bean, 154
Sucrose phosphate synthase, photoperiod effect, soybean/tobacco, 1080
Sugar
developing corn kernels, 207
transport into cotyledon protoplasts, soybean, 936, 941
uptake, maize, 617
Sugar beet, limiting factors in photosynthesis, 82
Sulfate
assimilation, C_4 plants, 873
uptake regulation, *Lemna*, 466
Sulfur
availability and sulfur-containing compound response, *Lemna*, 474
nutrition and seed protein mRNA, pea, 651
Sulfur dioxide/ozone mixture, plant response, lettuce/radish/pea, 43
Sunflower
jasmonic acid biosynthesis, 458
Kok effect and photosynthetic quantum yield, 95
pyruvate orthophosphate dikinase, 387
shoot gravitropism, 78
Synechococcus leopoliensis, growth and photosynthesis, 1064
Synechococcus sp., phycoerythrin, 732

T

Temperature
carbon translocation, *Echinochloa*, 1054
cold acclimation
plasma membrane, orchard grass, 31
plasma membrane alterations, rye, 818
-dependent photosynthesis, *Agrophyron*, 378
freezing characteristics, periwinkle, 720
heat stress response, pear, 778
photosynthetic response, desert plants, 364
Tendril, physiological studies, pea, 679
Thermocouple psychrometry, leaf sample size, soybean, 228
Thermodormancy, seed priming, lettuce, 290
Thermolysin, chloroplast surface probe, pea, 675
Thidiazuron, ethylene evolution, mung bean, 902
Thiol, activation of phosphoenolpyruvate carboxylase, maize, 983
Thuja occidentalis L. (*see* Cedar)
Thylakoid-bound polysomes, translation conditions, pea, 832
Tissue death, leaf rolling/osmotic adjustment, rice, 338
Tissue specificity, heat shock response, maize, 431
Tobacco
auxin and amino acid metabolism, 1048
cell culture heat shock protein, 639
CN-resistant respiration, callus, 876
enzyme targets of glyphosate, 839
ethylene elicitors, 1133
IAA and flower neoformation, 257
leaf disc oxalate metabolism, 505
monoclonal antibodies to arabinose/galactose, 1013
protein synthesis regulation, 1027, 1034
protoplast auxin conjugation, 54
pyruvate orthophosphate dikinase, 387
sucrose phosphate synthase rhythm, 1080
Tomato
anthocyanin synthesis photoregulation, 447
ethylene burst and seedling placement, 1167
ethylene contamination of CO_2 cylinders, 275
fruit softening, 891
suberin production, 716
Tortula ruralis, dehydration and membrane organization, 1075
Tradescantia paludosa, mRNA complexity and diversity, 865
Tradescantia virginiana, water potential measurement errors, 766
Translation, pea chloroplast, 1001
Triticale, peptide hydrolase, 480
Triticum aestivum (*see* Wheat)
Tsuga canadensis L. (*see* Hemlock)
Tunicamycin, cellulose microfibril formation, *Oocystis*, 534

U

Ultrasonic acoustic emission, cedar/hemlock sapwood, 988
Ultraviolet B, inhibition of phytochrome-induced anthocyanin, *Sinapis*, 997
Uracil phosphoribosyltransferase activity, *Haplopappus/Datura*, 161

V

Vacuole, endoproteinase localization, barley, 70
Valine, biosynthesis inhibition, pea, 827
Vanadate, plasma membrane ATPase, red beet/corn, 586
Vicia faba L. (*see* Broad bean)
Vicilin-like polypeptides, oat, 225
Vigna radiata L. (*see* Mung bean)
Vigna unguiculata (*see* Cowpea)

W

Water
  potential
    measurements and leaf sample size, soybean, 228
    photosynthesis, *Encelia*, 688
    Tradescantia, 766
  relations, salinity, *Alternanthera*, 281
  stress, seed development, soybean, 176
Wheat
  active starch granules, endosperm, 323
  glutamate metabolism and photorespiration, 60
  jasmonic acid biosynthesis, 458
  leaf aminopeptidase, 118
  leaf chloroplast senescence, 421
  peptide hydrolase, 480
  polyamines and osmotic stress, 102
  pyruvate orthophosphate dikinase, 387, 393
Wild oat
  peptide hydrolase, 480
  polyamines and osmotic stress, 102

X

Xanthium strumarium, ^{18}O incorporation into ABA and phaseic acid, 166
Xylem, differentiation by ethylene, lettuce, 1165
Xyloglucan, pea, 596, 605
Xyloglucan oligosaccharide, stem growth inhibition, pea, 295

Z

Zea mays (*see* Corn, Maize)
Zeatin riboside, cytokinin radiommunoassay, lupin/corn, 1117
Zinc nutrition, soybean, 1094
